

Thanks for attending my Overview Lecture on the information in my book, [Learning from the Ancient Ones, Truths to End Domination and Control](#)

I began sensing considering new the words or concepts without understanding them was important. Three years later, I functioned in an entirely new world! I was told in the early 1990's *"There will come a time when you will be give thanks for all the hours and years you have had to listen and learn and apply what we are here to teach you. There will come a time when people will have to learn quickly. "*

Now is that time.

When I first heard some of the truths from the Ancient Ones in the '90's, I realized how 'hood-winked' humanity had been. With only the half-truths we were living, humanity was doomed to a spiral into destruction and death. That is on the horizon.

I applaud your presence to listen to what may have seemed very different. What I know it is of great valuable to know yourself, your own presence, and your connection to your star family. Who are they? What was your commitment to them?

My Project for the next 4 years is:

Were you left with:

- Why am I here?
- What do I love?
- What is my super power?
- What next?

There are lots of options, ways to add this information to expand what you are currently creating in the world!
