## Class #9

### 7th World and the Problems we faced at that point:

- Your entire Star family which has fragmented into smaller family collectives are owned by Outsiders of domination. We have lost our voice of authority and are in the "role" of 'slaves'.
- There is a chip that had been inserted by one Star family to spontaneously drop and limit the frequencies from Home that remains within their 12 collective fields. This spontaneous drop and squeezing down of full Home energy impacts these groups directly and the rest of the 7 Star families vicariously, making stability impossible to maintain.
- There is a deep sense of guilt carried by the 13th group within one of the Star families that ripples through the greater collective of the 7 Star families.
- The contracts made by various Star family groups to put themselves into a state of "muddiness" in order to call for help from Outside families who are stable, makes "muddiness" or "chaos" a constant within the Star family Collective.
- Broadcasting from the Domination Outsiders continue." "You are not enough" continues and other messages to diminish, deceive, etc. are a constant.

Challenges needing solution:

- We are faced with the ending of our life force because of the parasitic nature and actions of the Domination Outsiders. What could we design as the next "plan" to remove the parasites presence, influence, creations, etc. and restore the 7 Star Families to their Original Agendas?

Now, What what Basics did the Original Plan for Earth Mission address and include?

The focus was on identifying and removing the Outsiders. Until they were gone, maintaining any degree of stability was impossible.

How to identify them and keep them from shifting away.

- Law of Manifestation... make them "visible"
- Law of Personal Choice... taking quick action rather than gathering consensus

Next platform/world would have denser energy

- Design a 'suit' that would provide the Soul with the form needed to 'walk-around'

Authority, since all within the various family collectives were "owned" and marked/monitored/controlled as the Dominating collectives chose.

- Two body suits with assignments that allowed for diversion and authority
- Male role to carry ownership contracts for two, nurture village through heart, would be monitored and cause diversion
- Female, free of ownership contract, could design, discern, declare, and remove domination energies
- DNA wiring had 15 basic power centers, Chakras, the paths for power center unfoldment were unique for Male and Female mission
