

New Economy from Ancient Truths 2-class self-directed course

Economics is energy manifested into various forms of currency.

Our energy has been captured. We have felt powerless as our life force has been taken. We have felt powerless as we have watched our innovative ideas taken from us or squashed.

We have felt powerless in the belief that our light inspired visions and gifts were not to be tainted with money exchange. The very process our families of light designed for thriving on this mission was twisted into a dogma that said spiritual gifts are pure and given only.

New economy is a return to our original intention. Our wealth is the unlimited ideas for bringing good, beauty and benefit.... currency into form.

Tree of life moves from roots up the centers of design, manifest, test, and share. Reaching branches into the worlds to say I am ready for more ideas for the next season of fruit.
