

TAG Level I

# TAG, Galactic System of Healing and Learning

"S/he who is the master of energy, determines the outcome."

Sananda

"If you want to understand the universe, you must understand energy, frequency, and vibrations."

Nikola Tesla

## TAG Concepts

1. The blueprint, DNA, power centers of our physical bodysuit have been corrupted to cripple humanity.
2. The journey of our soul has included 7 worlds before earth and great injury, dis-ease, and damage was done within our Divine Star Family groups in that journey.
3. Our galactic worlds have to be understood in order to effect deep, permanent change.
4. The frequencies we call duality; i.e., fear, and abuse, had their beginnngs in the third world and must be addressed.
5. Choices and beliefs from lifetimes of painful, hurtful, fear-based experiences have created patterns and habits. This distorted life force energy exists within each individuals life bio-field. It disrupts frequencies and sabotages healthy living.
6. Each experience of trauma effects all energy bodies, spiritual, emotional, mental, and physical areas of human being. The vibrations of all those bodies must be included in any recovery/healing program.
7. Disconnects in energy circuitry and blockages in individuals DNA have resulted in thoughts, behaviors, emotions contrary to our health, peace, abundance, and unity. These systems must be corrected for whole living.
8. Lifetimes of unseen negative vibrations have created a dense field around the planet which causes a sense of separation from the non-linear, spirit realms. This density adversely affects humankind and needs clearing.
9. Angels and spiritual beings of integrity are available to transform the energy distortions and are simply waiting for our request.
10. The universe offers cycles of energetic help. We look at the cycles, their power, focus, and purpose and take advantage of them.
11. Energy carries unlimited information for guidance and can be accessed in a multitude of ways.
12. A human being is in absolute charge as to the experiences he/she calls forth. Why we cluttered our home is not as important as having the toolbox of processes to clean it and design for new.

13. There are basic laws which govern nature, man, and the universe. Anciently, they were taught in the mystery schools. Now, we are being lead to bring them out of the hidden worlds to apply them for Good.
14. TAG has a unique role to play in the healing arena. Working with those in the unseen, we can quickly and deeply clear our chaotic energy. As we unplug from distorted energy our negative costumes drop off. We are like new bottles ready to hold and express the divine without distortion.
15. Spirit is the beginning
16. From the physical, all dimensions can be healed
17. Extreme storage, which equals dysfunctional behavior precludes reaching out and colors all in life
18. There is no separation between body and mind
19. The world is ME!
20. When you hear hoof beats, don't look for zebras
21. Integrity and intention is critical!
22. The original purpose for the planet affords the right to heal All distored energy
23. Those in physical have the right to ask and receive.
24. Intention of the TAG work
25. to restore an individual's environment of wholeness
26. to clear and validate an individual's inner guidance system
27. to teach TAG techniques
28. to maintain a ego-less flowing ISnesss state with highest integrity
29. to realize that what flows through in each moment is the highest truth in that moment
30. to assist in the elimination of all dysfunction, distorted energy from the planet.
31. To act as a bridge between healing possibilities of integrity.

# Objectives

## Re-At One Now

Living in integrity with the truth of your Divine self transcends the cultural perceptions and limits. TAG's purpose is to facilitate that transition.

- To free individuals of all domination energies.
- To open and strengthen an individual's connection to their spiritual guides of integrity.
- To restore an individual's voice of authority.
- To teach awareness and tools/processes that remove that which is false.
- To restore sovereignty which allows the experience of BEING an conscious expression of the divine to emerge

# Course Overview

In the TAG Facilitation Course, there are three Levels. Each of the three levels will build on the former ones.

## Level I

Purpose: to give understanding of an individual's Bio-Field of energy, what it contains, why, including past/family trauma, stories and dogmas of survival, and systems which entrap to use others.

We will gain understanding of Universal Laws, establish a vision of self sovereignty, and teach the means for individuals to extradite themselves from all false forms. We will learn why that has been the majority experience and learn processes which will give the means of making changes sure.

The material will be presented with a combination of learning styles, verbal, visual, and experiential. There will be times for self examination, for group interactions, and for spiritual guidance in sacred silence.

We will explore the necessity of transforming the old, distorted energy in order to walk life as individuals able to respond.

We will look at the value of conscious awareness, personal choice and integrity in the field of teaching and healing.

You will be given a model for the Level I TAG session. This session will come with information, evaluation and the tools to cause major changes to the DNA, Chakras, Energy flow, and Self-Empowered healing.

You will be encouraged to offer this session for yourself and others in order to practice what you are learning.

## First Month
